

Near real-time visibility on the safety and location of your lone workers —
so you can protect your people,
assets and reputation.

ConneXt Loneworker Solution

No matter how **remote** their **location**,
lone workers are
only a **click** away.

**Do you have workers who operate alone in remote areas?
If these workers were exposed to toxic gas, how quickly
would you know about it?**

Honeywell's ConneXt Loneworker makes it easy to track the near real-time location and safety status of your lone workers — so you can protect your business and your people, ensuring they make it home at the end of their shift.

A portable wireless infrastructure for constant safety awareness

ConneXt Loneworker, like the rest of Honeywell's ConneXt Safety Solutions, gives you near real-time wireless visibility on safety data, so you can make better, faster decisions. The portable infrastructure is created between the wireless gas detector and a vehicle mounted router with cellular/satellite communication.

This mobile infrastructure sends safety and location data to a cloud-based platform with map overlays — called Trakopolis — which you can access from any computer or mobile device with an internet connection.

ConneXt Loneworker Solution

Always Connected.

The ConneXt Loneworker Solution communicates over both cellular and satellite networks, so you can have remote visibility and communication to field operators. If a cellular network is unavailable, ConneXt Loneworker will automatically switch to a satellite signal.

ConneXt Loneworker Solution connects you, so you can:

- Elevate safety of your remote workers. Know and respond to what's happening in near real-time.
- Obtain remote verification that procedures are met.
- Improve gas detector compliance and usage.
- Efficiently track down lone workers.
- Collect gas data quickly, for better decision making
- Easily check maintenance status of vehicles
- Reduce lost assets

Honeywell wireless portable gas detectors and Trakopolis cloud-based software connects you, so you can:

Continually Monitor for Safety.

- Simply click for near real-time gas status and location.
- See the gas readings on each lone worker's detector at any time.

Get Man Down Notification.

- Find out immediately if a worker stops moving whether from a gas exposure, a fall or other safety incident.

Receive Gas Alarm Notification.

- If a lone worker encounters a gas alarm, know via email alert and Trakopolis
- If a worker fails to report an alarm, know before sending other workers.

Quickly Respond to Remote Workers.

A worker is in physiological distress? Trapped?

- The gas detector panic button sends an alert so you can plan a response.

Two-way Text Message. Need to advise of a safety hazard? Communicate a change in schedule?

- Simply click the worker's location on Trakopolis and send a text message to the worker's detector. The worker can respond with a text back.
- Automate Check-in/Check-out.
- Automatic text reminders prompt a workers' gas detector. They can quickly respond with a preloaded status messages.

ConneXt Loneworker Solution

Reliable two-way communications,
ensuring your **lone workers** are
never completely alone

**ConneXt Loneworker provides a one-of-a-kind solution
for gas detection and asset tracking.**

Connected Safety Manager

Always Connected

ConneXt Loneworker Solution

Honeywell's unique solution reliably keeps safety managers and lone workers connected close to 100 percent of the time via cellular or satellite networks

Safety managers have near real-time with visibility to location, detector status, and vehicle information. You can also receive man-down alerts, communicate with two-way text messages on the gas detector, plus more.

Vehicle Mounted Router and Satellite Terminal

Wireless Gas Detector

Connected Remote Worker

ConneXt Loneworker Solution

Near **real-time** gas intelligence to
improve **safety**, compliance and productivity

In addition to improving the safety of your remote workers, ConneXt Loneworker helps you optimize your operations and automate your safety administration:

- **Demonstrate compliance with regulation.**
See the current and historical gas readings of each lone worker's detector.
- **Be proactive and develop preventive policies.**
Are gas concentrations changing in a certain location? Trakopolis organizes your loneworker data so you can analyze patterns and make better decisions about safety and operations.
- **Automated reminders.** Who's due for a safety certification or a training course? ConneXt Loneworker notifies you of upcoming needs, so you can proactively ensure compliance with safety procedures.
- **Sensor compliance at a glance.** Is a lone worker's detector bump tested and in compliance? No need to download detector data from the docking station, ConneXt Loneworker automates data reports to Trakopolis. Verify detectors are calibrated on schedule, when bump tests are due and more.

IntelliDoX
Docking Station for
Gas Detectors (optional)

Save time. Easy automation of gas detector bump tests, calibration and configuration with Honeywell docking stations. Sold separately.

ConneXt Loneworker Solution

A **one-stop** dashboard for
tracking the **safety** and
operations of **lone workers**

ConneXt Loneworker is the only solution to combine remote-worker gas detection AND asset tracking into one web-based monitoring platform.

In addition to maintaining near real-time visibility of your workers' gas status, you can track vehicle location and worker behavior — as another way to improve safety, optimize operations and manage costs.

Journey management and driver scorecards.

Use ConneXt Loneworker to create reports for each worker, so you can coach them on safety and cost management. How fast are lone workers driving? How much time/fuel per trip?

Theft prevention and asset recovery. ConneXt Loneworker tells you where your vehicles are at all times, so you can prevent theft and quickly recover any lost property. You can even set Trakopolis to notify you every time a vehicle is leaving a storage yard or jobsite.

Preventive maintenance. Thanks to ConneXt Loneworker's asset tracking, you can predict the need for oil changes and other maintenance, so you can reduce costs, prevent breakdowns and improve driver safety.

ConneXt Loneworker Solution

A wireless solution to easily monitor your workers and assets

ConneX1 Provides at a Glance Lone Worker Status

Automated Check-In/
Check-Out Messages

Easy to Use Interface
and Maps

2 Way Texting between
ConneX1 and Trakopolis

Thanks to Honeywell's wireless gas detection technology, plus the intuitive cloud-based technology of Trakopolis, it's never been easier or more cost-effective to improve the safety and productivity of your lone workers. With ConneXt Loneworker, you can count on:

- **The data you need in three clicks or less.** Whether you want to see the gas reading on a lone worker's detector, send him a text or check the location of a vehicle, you can do it all in one intuitive, centralized interface. That's especially critical in an emergency — when every second counts.
- **High availability, with no need to boot up — and no complex installations.** Since Trakopolis is a cloud-based application, it's ready when you are — as long as you have an internet connection. Just log in from your desktop computer, smartphone or tablet to monitor your lone workers and assets, wherever they are. And since Trakopolis is in the cloud, there's nothing to install or download.
- **The reliability and data security of Honeywell.** Honeywell, a global leader in safety technology, provides solutions for industries from space to oil and gas. Rest assured that ConneXt Loneworker delivers superior value, helping you protect the lives of your lone workers wherever they're at risk. And your workers can feel safer knowing that no matter how remote they are, they're never completely alone.

Contact us to get a whole new level of visibility on remote workers and assets — so you can ensure safety, prevent a crisis and protect your company's reputation.

Honeywell Analytics Gas Detection Offerings

Honeywell Analytics gas detectors protect people, assets and environment from toxic and combustible gas hazards, helping to create safer, more comfortable, secure and productive environments. Our strength derives from Honeywell's leadership in sensor technology; in fact Honeywell operates four sensor manufacturing plants, supplying an entire industry with its core detective element.

Commercial

Gas detection from standalone units to fully engineered, multi-point systems, all offering cost-effective regulatory compliance.

- » Applications: parking structures, chillers, mechanical rooms, office towers, commercial buildings, shopping centers, swimming pools, golf courses, schools and universities, laboratories

Industrial

Renowned Sieger and Manning gas detection systems with advanced electrochemical, infrared and open path sensing technologies.

- » Applications: oil and gas, cold storage, water/wastewater treatment, chemicals, engine rooms, plastics and fibers, agriculture, printing and light industrial

Portables

Single or multi-gas detectors ranging from compact, lightweight designs for personal protection to systems-based, networkable instrumentation for industrial hygiene.

- » Applications: underground utility and electricity ducts, boiler rooms, post-fire sites, sewers, industrial plants, industrial hygiene, first responder teams, remote fleets
